

Projection Files

An important feature of the NumberSense Mathematics Programme is the ability of teachers to project the workbook pages onto a screen in their classrooms if they have a data projector.

The NumberSense Workbooks Projection files are available at no charge on the Snapplify platform.

To use the projection files, you must:

1. Go to the [Snapplify website](#)
2. Sign in or register as a Snapplify user.
3. Download and install the [Snapplify reader](#) on your device if you do not already have it.
4. Search for [NumberSense](#) and select the Workbooks you need and add them to your cart (R0 per workbook). Follow the checkout prompts to add the workbooks to your Snapplify library.
5. To be able to project the files when you are offline, open the Snapplify reader on your device and download the workbook(s) from your Snapplify library. The workbooks will be in your “Downloads folder”.
6. Use the reader to project the workbooks in your classroom.

These files expire in July each year and from June you will need to download the workbooks again.
